TECHNICAL SKILLS

Front-End: HTML5, CSS/SCSS, JavaScript, TypeScript, React, Angular, Bootstrap

Back-End & Data: Supabase / Postgres, Express.js, MySQL, REST APIs, Web3Forms

Workflow: Git, GitHub, npm, Angular CLI, VS Code

Design Tools: Figma, FigJam, Photoshop, Illustrator

EDUCATION

Diploma, Web Development & Digital Design

VanArts | Vancouver, BC

Graduating Aug 2026

Coursework: Responsive Web Design, Angular, JavaScript, WordPress, UI/UX Design, Typography and Git/GitHub.

STRENGTHS

- Practical debugging
- Responsive layout thinking
- Clear project documentation
- Client-focused communication
- Design-minded front-end work

PROFILE

Design-minded front-end developer building responsive web experiences through Angular, HTML/CSS and practical UI thinking. Brings real-client project experience, Git/GitHub workflow and a hands-on background in delivering clean, finished work.

MY DEVELOPMENT EXPERIENCE

Table Tracker | Live MTG Playgroup Web App

React | Ionic | TypeScript | Supabase / Postgres

- Built and deployed a mobile-first app for tracking a playgroup game night, decks and standings, now in real-user beta.
- Reached by join code with no user accounts, and secured with row-level security policies on every table.

Arcane Vault | Angular E-Commerce Web App

Angular | TypeScript | SCSS | Express.js | MySQL

- Built a storefront and admin dashboard front to back, with filtering, sorting, product detail views and full CRUD.
- Connected the front end to a REST API over MySQL and tested add/edit/delete flows, live/offline status and filtering.

Mountainside Millwork | Real Client Website Build

Angular | Responsive Design | Web3Forms

- Shipped a responsive multi-page site for a working millwork business, with a clear quote-request path.
- Integrated an email-based inquiry form and tested desktop and mobile behavior for a reliable client handoff.

ValorBot | Python Test Engineering & Automation

Python | Config-Driven Design | Structured Logging | Git/GitHub

- Wrote 400 tests across 26 modules, injecting failure cases rather than testing only the paths that succeed.
- Config-driven throughout with nothing hardcoded, using structured logs and baseline comparisons to verify changes.

PROFESSIONAL EXPERIENCE

Carpenter | Mountainside Millwork

Mission, BC | Sep 2011 - Aug 2022

Delivered custom residential and commercial millwork while coordinating with clients and contractors around quality requirements and timelines.

Property Manager | Peakman Management Group

Calgary, AB | Jul 2009 - Sep 2011

Managed daily operations and stakeholder needs across multiple fitness facilities.

Drywall Taper | Peak Drywall Finishing

Mission, BC | Jan 2004 - Jul 2009

Completed quality-focused finishing work across commercial, residential and industrial projects.
